

DEADLY CONSEQUENCES

400-PS024 (R. 04/2024)

A seemingly routine visit turned deadly at a Washington state prison in August 2023. An incarcerated individual died after ingesting a large amount of methamphetamine given to him by a visitor. She pled guilty to controlled substance homicide and is currently serving a 51-month sentence. The incarcerated individual's cellmate was also charged with conspiracy to commit delivery of a controlled substance.

Attempting to introduce contraband can have devastating consequences. Don't let one bad decision ruin your life.

If you believe that your loved one is using dangerous or controlled substances; if you are being pressured to bring dangerous or controlled substances into the facility:
