Legislative Directive

Engrossed Substitute Senate Bill 5119 (2021)

Unexpected Fatality Review Governance

RCW 72.09.770 requires the Department of Corrections (DOC) to convene an Unexpected Fatality Review (UFR) committee and meeting in any case "in which the death of an incarcerated individual is unexpected, or any case identified by the Office of the Corrections Ombuds." The department is also required to issue a report on the results of the review within 120 days of the fatality and, within 10 days of completion of the review, develop an associated corrective action plan to implement any recommendations made by the review team. The statute took effect July 25, 2021.

The "primary purpose of the unexpected fatality review shall be the development of recommendations to the department and legislature regarding changes in practices or policies to prevent fatalities and strengthen safety and health protections for prisoners in the custody of the department."

"'Unexpected fatality review' means a review of any death that was not the result of a diagnosed or documented terminal illness or other debilitating or deteriorating illness or condition where the death was anticipated and includes the death of any person under the jurisdiction of the department, regardless of where the death actually occurred. A review must include an analysis of the root cause or causes of the unexpected fatality, and an associated corrective action plan for the department to address identified root causes and recommendations made by the unexpected fatality review team under this section."

Unexpected Fatality Review Committee Report

The department issued the UFR committee report 22-033 on February 23, 2023 (DOC publication 600-SR001). This document includes the required corrective action plan. The department is required to implement the corrective actions within 120 days of the publication of the committee report.

Corrective Action Plan

CAP ID Number:	UFR-22-033-1
Finding:	The incarcerated individual would have benefited from long-term medication assisted treatment (MAT) for his chronic Opioid Use Disorder (OUD).
Root Cause:	There is no formal process for incarcerated individuals to be provided MAT and referred for continued treatment in the community when they are being housed in a contracted community jail.
Recommendation:	DOC work with the community jail custody and their medical staff to discuss their ability to provide incarcerated individuals with MAT and the assistance DOC can provide to assist incarcerated individuals needing connected to a community treatment program when they reenter their community.
Corrective Action:	DOC conduct a debrief with the contracted community jail custody and their medical staff.
Expected Outcome:	Improved care coordination for incarcerated individuals reentering their community.
