

Corrections' COVID-19 Bulletin

January 27, 2021
Bulletin 28

Current Status

Medical isolation and quarantine among the incarcerated population

- Medical Isolation: separating a symptomatic patient with a concern for a communicable disease from other patients.
- Quarantine: separating from other individuals those who are not showing symptoms yet have been exposed to an individual with a contagious disease.
- Federal quarantine and isolation currently apply to the following diseases: cholera; diphtheria; infectious tuberculosis; plague; smallpox; yellow fever; viral hemorrhagic fevers; influenza caused by new or re-emergent flu viruses that are causing, or have the potential to cause, a pandemic; and severe acute respiratory syndromes (which may include COVID-19).
- Current medical isolation and quarantine status
 - 860 Incarcerated individuals in medical isolation
 - 1,448 Incarcerated individuals in quarantine
