Helpful hints for preparing for your EFV

- Visitors showing up for a scheduled visit must comply with clothing standards per DOC 450.300 Visits for Incarcerated Individuals
- Dollar store-type franchises may offer many listed items at a low cost
- Visitors should bring enough clear, plastic storage containers to allow for all items that may need to be transferred to allow for searches of items brought for the visit
- Small, sealed seasoning packets are available at most grocery stores
- Whole fruits and vegetables that need to be cut up, will need to be prepared ahead of the visit since knives are not allowed and will not be provided by the facility
- If a visitor’s suitcase/backpack/duffel bag will not fit through the x-ray or scanning machine, it will not be allowed to be taken into the facility
